

Square ventilation key for radiator plugs.

Air often accumulates in radiators. Air in the radiators reduces heat transfer. This results in the radiator not fully heating up. Air in the radiator also causes unwanted noise, such as tapping and humming. Finally, unwanted air in the installation causes corrosion. The radiator can be vented easily using the ventilation key. Note, it is a good idea to keep a cloth handy to catch the water that runs out of the valve, this water can be discoloured and could leave stains on the wall and / or carpet.

Technical Specifications

- Material: Nickel-plated metal

Description	Ventilation Key
Order Code	F11202
Model	<u>Metal Ventilation Key</u>
Dimension [mm]	5

Classification General Data

Etim Group	Plumbing and HVAC tools
Etim Class	Air bleed key
Product Name	None
Brand	Flamco
Product Type	Installation accessories
Order Code	F11202

Attributes

Number of keys	1
Square size 1	5 mm
With key ring	No
With drain valve	No
Material	Other
